Aim and Scope: *Numerical Heat Transfer, Part A: Applications* is an international vehicle for the publication of numerically based, results-oriented papers dealing with problems in heat transfer, mass transfer, and fluid flow. The underlying numerical solutions may be based either on available methodology or on adaptations of moderate extensions of available methods. The presentation of experimental results which support the numerical solutions is also acceptable. However, papers whose main focus is on innovative numerical methodology development should be submitted to a companion journal, *Numerical Heat Transfer, Part B: Fundamentals*.

Abstracted/Indexed in: CSA Aluminum Industry Abstracts; CSA Computer Information Systems Abstracts; CSA Engineered Materials Abstracts; CSA Environmental Sciences & Pollution Management Database; CSA Metals Abstracts/METADEX; Chemical Abstracts; CSA Corrosion Abstracts; Current Contents/Engineering, CSA Technology Research Database; Computing, and Technology; Engineering Information Inc.; Engineering Index Monthly; Information Service in Mechanical Engineering (ISMEC); Materials Science Citation Index™; Nova Information Services Co.; Research Alert; Science Citation Index; SciSearch.

Numerical Heat Transfer, Part A: Applications (Print ISSN: 1040-7782) is published in print monthly for a total of 12 issues per year by Taylor & Francis Group, LLC, 325 Chestnut Street, Philadelphia, PA 19106. Periodicals postage paid (USPS permit number 670-430) at Philadelphia, PA and additional mailing offices. *Numerical Heat Transfer, Part A: Applications* (Online ISSN: 1521-0634) is published online biweekly for a total of 24 issues per year.
